

IT'S NOT JUST ANOTHER STREAMER™

The new DSX 1000 from Chord Electronics is a state-of-the-art network music player offering unrivalled sound quality from high resolution music files.

The Highest Resolution Available

The DSX 1000 supports: MP3, WMA, WAV, AAC, ALAC, AIFF, FLAC up to 24/192 and DSD via Ethernet.

The World's Best D/A Conversion

Instead of just using the best DAC chips available, Chord engineers designed their own DAC for their flagship QBD76. The QBD76 will faithfully reproduce a signal all the way down to -140dB; a huge 40dB better than the world's best DAC chip! With Chord's DSX 1000 you get this same world leading DAC technology built right in!

Direct Connection to the DAC for Crystal Clear Sound

Not only will you have this best-of-breed DAC technology, but the DSX 1000's streaming engine is directly coupled to the DAC. This important advantage reduces jitter distortion to literally unmeasurably low levels resulting in an unrivalled clear pure sound.

Nothing is Easier to Use

Simply connect the DSX 1000 via the supplied Ethernet cable and it will automatically find the music on your NAS drive. Then easily select music from your iPad, iPhone or any other UPnP device.

Connect Directly to Your Amplifier

The DSX 1000 features fixed and variable outputs so you can connect it directly to a power amplifier and operate your system with your iPad, iPhone or any UPnP device. This direct connection improves the sound quality and saves you money. Fully balanced of course.

Analog Volume Control for the Best Sound Quality

Unlike other network music players with built-in volume controls, the DSX 1000 features the pure analog volume control circuit of Chord's CPA 5000 Reference pre-amplifier. As a result there is absolutely no loss of sound quality when you connect the DSX 1000 directly to a power amplifier and control the volume with your iPad.

"Chord's flagship streamer is an undeniably impressive piece of equipment. Supremely easy to operate with a beguiling sound that boasts detail, dynamics and a wide soundstage. Outstanding – amongst the best."

- HiFi World Five Globe winner, December 2013.

"The DAC stage of the DSX 1000 is right up there with the best; open and lucid sounding and capable of projecting wide, deep and stable images. The DSX 1000 is truly state-of-the-art with bass and midrange distortion further reduced over the QuteHD to a mere 0.0008%. Most impressive." - HiFi News, May 2013

England's Chord Electronics is an engineering firm with a passion to make the world's best sound. When the best components available limit performance Chord engineers design their own, thus leading the state-of-the-art. That's why Chord is the choice of top professionals at: Skywalker Sound, BBC, Abbey Road, EMI, Decca, Sony, Deutsche Grammophon and more.

The Chord DSX 1000. It's not just another Streamer... It's a Chord.
