

Father  
QBD76 HDS DAC \$8,500

Son  
QuteHD DAC \$1,795

## IT'S NOT JUST ANOTHER DAC™

Like Father, Like Son. The new QuteHD is an ultra-high resolution asynchronous USB DAC which plays 384 kHz and DSD music files.

### The Highest Resolution Available.

The QuteHD resolves a breath-taking 192kHz and DSD through its USB input, 192kHz via optical and 384kHz via Coax.

### The Best D/A Conversion Available.

Instead of just using the best chips available, Chord engineers designed their own DAC for their \$8,500 flagship QBD76. The QBD76 will faithfully reproduce a signal all the way down to -140dB which is a huge 40dB better than the world's best DAC chip! With Chord's new QuteHD you can now have this same incredible technology for only \$1,795!

### Nothing is Easier to Use.

Simply connect all three inputs, press Play, and the QuteHD automatically selects the input and adjusts the resolution.

*"It's simple, looks great and sounds absolutely fantastic." - What HiFi Product of the Year 2012*

*"a totally fabulous performance"  
- HiFi Choice, June 2012*

*"Competitive with top flight CD players from Esoteric, dCS, Accuphase and EMM Labs, this DAC goes head to head and matches them on most scores... an absolutely stunning result for the QuteHD. I am wildly enthusiastic about this DAC".*

*- Phil Gold, enjoythemusic, December 2012*

England's Chord Electronics is an engineering firm with a passion to make the world's best sound. When the best components available limit performance Chord engineers design their own, thus leading the state-of-the-art. That's why Chord is the choice of top professionals at: Skywalker Sound, BBC, Abbey Road, EMI, Decca, Sony, Deutsche Grammophon and more.

The new Chordette QuteHD. It's not just another DAC... It's a Chord.
